Two powerful programs you need at a price you won't believe — just $49.95 each!

Things always seem to get done faster when you have the right software. That's why many people are using two of today's most powerful programs available — *pfs:WRITE* and *pfs:FILE/REPORT.*

These remarkable programs make it easier than ever to answer a wide range of personal and professional needs. Word processing ... filing ... spreadsheets ... direct mail ... graphs and charts ... database management ... and much, much more!

Scholastic pfs®:WRITE

This is the perfect word processor for home or office use. *pfs:WRITE* is simple enough for computer novices to begin using at once, yet it contains the sophisticated features you want most in a word processor — *including a 75,000 word integrated spelling checker.*

With *pfs:WRITE,* you'll write everything — letters, reports, flyers ... even shopping lists — with ease and speed. The program rapidly checks and corrects documents as you compose; scanning for typographical errors, misspelled words and irregular capitalization. So you'll never worry about typing mistakes again.

Best of all, *pfs:WRITE* lets you see your document on screen exactly as it will print. You'll never wait to see your finished creation to decide where and when to indent, italicize, underline or use boldface type.

Create your own direct mail

pfs:WRITE also contains a powerful File disk that lets you create your own personalized form letters. This advanced feature is usually found only on expensive word processors!

Scholastic pfs®:FILE/REPORT

Decision-making has just been made easier with these two enormously versatile programs — packaged together and offered at a price you can't find anywhere else.

pfs:FILE/REPORT turns your computer into a powerful filing and reporting system that organizes information for more precise management.

Perfect for home businesses or for recording family insurance, finance and investment information, *pfs:FILE* helps you create and update data files. An advanced Search Feature retrieves files by key words, making it easier than ever to keep important information at your fingertips.

pfs:REPORT adds powerful report generation capabilities to FILE; creating charts, columns, lists, tables, and forms. With *pfs:REPORT,* you can perform calculations instantly ... totaling columns, averaging, and counting — as well as alphabetizing columns or listing data numerically. And, *pfs:REPORT* lets you sort, search and select information to be included in reports to suit your individual needs.

A "what-you-see-is-what-you-get" feature provides the ability to see on screen just how your printed report will look.

DON'T miss this chance to own these powerful applications programs at an unbeatable price!
